

Astrachat Fact Sheet

Astrachat is a standalone and lightweight Jabber (XMPP) client application for mobile and desktop that connects directly to your XMPP server without any proxies in-between. Astrachat is always connected to your XMPP server in the background and provides you with immediate push notification of new messages.

Astrachat works on Android, BlackBerry 10 & Apple iOS devices, Window, Linux and Mac desktop, also can scale to support millions of simultaneously connected users. Astrachat is a product of Rockliffe Systems who have been developing rock solid communications systems since 1995.

Key Features of Astrachat

- **Direct XMPP Connection:** Astrachat has been designed to connect directly rather than relying on a proxy server that might compromise your password or message content.
- **VoIP Calling:** Astrachat supports VoIP calls in the Android and iPhone clients.
- **Group Chat:** Secure communication with unlimited group members.
- **Integrated Picture and File Sharing:** Share pictures, documents or other files to anyone on your contact list.
- **Full Support for Desktop and Mobile Devices:** You can sign on, and chat from all your devices, including PC, laptop, tablet or smartphone at the same time.
- **Mobile - Desktop Message Sync:** Astrachat has built-in message sync between clients to ensure you never miss a message.
- **Secure Connection:** Astrachat supports SSL and TLS to secure your connections to your server.
- **High Availability Server Cluster**
- **No Ads**
